

PROVIDENCE
BUILDERS
Colorado Luxury Homes

January 15th, 2009

To Whom It May Concern:

I would like to take an opportunity to offer a formal recommendation for Franz Stone and Aspen Digger, Inc. As the Vice President of Field Operations for Providence Builders, LLC I have known Franz for approximately one year and feel that Aspen Digger, Inc. is a deserving candidate for your project.

Aspen Digger, Inc. joined our construction team as our single source for infrastructure work and mass excavation at the Ute Mesa Project in Aspen, CO. After a short period of time it was evident that Franz and his team are leaders in their industry. The entire construction team could not help but notice how successful they were at executing the installation of the underground utilities, the access roads and material handling for a 40,000 sq ft project. The Ute Mesa site, which is composed of (2) 20,000 sq ft residences and (1) 3000 sq ft residence, requires a high level of attention to detail, an ability to deal with adversity and good problem solving skills.

Franz leads by example and many people here find his dedication an essential part of our success. As the owner of Aspen Digger, Inc. Franz has worked hard to build authentic relationships with his employees. His efforts have created a highly productive and professional team.

I believe Franz exhibits many of the qualities that are essential to construction general contractors. I highly recommend Franz Stone and Aspen Digger, Inc. for any project and hope that you will carefully consider their services.

Sincerely,

Robert Faessler II
Vice President of Field Operations
Front Range Divisions | Western Slope Divisions
Providence Builders, LLC
