To Whom It May Concern,

I have been asked to prepare this letter of reference for Aspen Digger Inc. We have worked with them on a number of large projects and have found them to be an excellent company to do business with. They consistently provided quality service, on time, and within budget.

I believe they perform so well because they are knowledgeable, experienced and great team players. They plan ahead, come prepared and are well organized. We have found they communicate effectively and timely with both office and site personnel. Their drivers and operators are qualified and their equipment is in excellent shape; both contribute to an efficient and safe working environment.

My last project with them was on a tight urban site with many very technical aspects to it. It is one of the most difficult projects we've undertaken to date and required a wide range of experience and skills. The project constantly tested everyone's abilities to work effectively with others. Aspen Digger performed admirably.

Franz is consistently straightforward, honest and willing to help however he can. It all adds up to an excavation company that works hard to help you keep your project moving forward successfully. Please feel free to contact me to discuss my experience with them further.

Sincerely,

Mark Elice  
Project Manager
