RE: Aspen Digger Inc. Performance on City of Aspen Project 2009-066

To whom it may concern:

Aspen Digger Inc. has performed well on the City of Aspen Project 2009-066: Burlingame Ranch Phase I – Irrigation Ditch & Stormwater Drainage System Extension Project.

The City's selected contractor; Aspen Digger, worked proactively prior to construction to ensure a timely, accurate, and efficient completion of this project. This company and their representatives continually demonstrated conscientious and responsive management of personnel and materials. Despite limited site access and close proximity to residential housing Aspen Digger Inc. performed well mitigating both noise and attractive nuisances to the general public. Efforts of Aspen Digger and their field staff virtually eliminated complaints, and allowed adjacent public amenities to remain in use during the project. City Staff has been pleased with Aspen Digger, Inc.'s performance thus far in regards to this City contract.

Sincerely,

Tyler A. Christoff, E.I.T., C.F.M.
