RE: Aspen Digger Inc. Performance on City of Aspen Projects

To whom it may concern:

Aspen Digger Inc. has been a familiar civil contractor on various City initiated and private projects over the past few years. Aspen Digger performed well on various City of Aspen Projects. This letter serves as acknowledgement of their ability to provide civil site work services.

Aspen Digger's proactive approach to construction has ensured timely, accurate, and efficient completion of the following projects: Burlingame Irrigation & Stormwater Drainage, Jennie Adair refreshing flow, Ute Avenue Utility Upgrades, Mill Street Utility project, Mill Street Complete Streets, and Roaring Fork Road waterline improvements. This company and their representatives' have continually demonstrated responsive management of both their personnel and materials. Despite complex sites and regulation within the City of Aspen, Aspen Digger Inc. maintained a professional approach and conscientious attitude toward important community values. Efforts of Aspen Digger and their field staff virtually eliminated complaints, and allowed adjacent public amenities to remain in use during these projects. City Staff would utilize their services again for future contracts.

Sincerely,

A handwritten signature in black ink, appearing to read "Tyler A. Christoff". The signature is stylized with overlapping loops and a long horizontal stroke at the end.

Tyler A. Christoff, PE, CFM, PMP

Director

City of Aspen

Utilities Department
